

# New Look for xSITE

Good news! Our xSITE Learning Management System (LMS) is getting a facelift! Starting from 26 April 2017, you'll notice a new look and feel for xSITE. A cleaner interface, new fonts, updated icons and some new workflows mean that your courses will look more polished and modern than ever.

The new user interface, called the Daylight Experience, was built with a responsive design. This means that it adapts to different screen sizes and looks great on laptops, tablets and smartphones. You'll find it much easier to stay connected and access the system from anywhere.

Although your common workflows aren't changing, you'll notice some positive changes when you first dive in. New fonts, icons and an updated layout will make it easier for you to go in and get right to the content that you are interested in. All of your courses will adopt this new look and feel, providing you with a consistent experience when accessing different courses.

We're excited for this change and the improvements that we'll see in the Learning Management System. If you would like more information you can contact the LMS Support at [lms.support@singaporetech.edu.sg](mailto:lms.support@singaporetech.edu.sg).
